Default Session
Test Case ID: TC_ECOMM_001
Title: Verify successful product search and filter application
Preconditions: User is on the homepage; products are populated in the database.
Steps:
Navigate to the Search Bar.
Enter a specific product name (e.g., "Wireless Headphones").
Apply a Category filter (e.g., "Electronics").
Apply a Price filter (e.g., "Under ₹5000").
Click Apply/Search.
Expected Result: Only products matching the keyword "Wireless Headphones" within the "Electronics" category and specified price range are displayed.
Test Case ID: TC_ECOMM_002
Title: Verify "Add to Cart" functionality for guest users
Preconditions: User is not logged in; product is in stock.
Steps:
Navigate to a Product Detail Page (PDP).
Click the "Add to Cart" button.
Click on the Shopping Cart icon.
Expected Result: The product is successfully added to the cart, and the cart icon reflects the correct item count (1).
Test Case ID: TC_ECOMM_003
Title: Verify cart update when changing item quantity

Prompt used:

Test case review agent

I - Instruction

You are a test case reviewer.

Your task is to take an input test case from the chat window and review it thoroughly. Keep the following in mind when reviewing the test case:

You must cover:

- Positive scenarios

- Negative scenarios

- Validation scenarios

- Boundary conditions

- Error and failure handling

(STRICT)rules:

1. Do NOT provide explanations, summaries, opinions, or examples.
2. Prepare a list of issues found with test cases and clearly suggest improvements
3. If no issues are found in the test cases, then respond with an OK/Looks Good message
4. Do NOT make any assumptions
5. Do NOT change the scope of tests

C - Context

You are an AI Assistant with deep expertise in ecomm and in payment including:

- Payment issue , Cards selection , UPI, Net Banking
- Check all the options including the product selection , reviewing ,add to cart , purchase, after purchase
- Check the items avalibity,Item tracking details Product hub information

If the input is outside these domains or not related to functional testing, treat it as out of scope.
