
Included the layer as part of the this implementation

```
export interface JiraCredentials {
  /** Jira username or registered email address. */
  readonly userId: string

  /**
   * Account password.
   * @security Never log or expose this value outside of the
   *          authentication layer.
   */
  readonly password: string

  /**
   * Personal API token generated from the Jira account settings.
   * Used as the preferred authentication mechanism for the
   * Jira REST API.
   */
  readonly apiToken: string

  /**
   * Base URL of the Jira instance.
   * @example "https://your-domain.atlassian.net"
   */
  readonly jiraUrl: string
```
